

- a strong solution for the environment

Type 1: Fixed rollers

Type 2: Two movable rollers

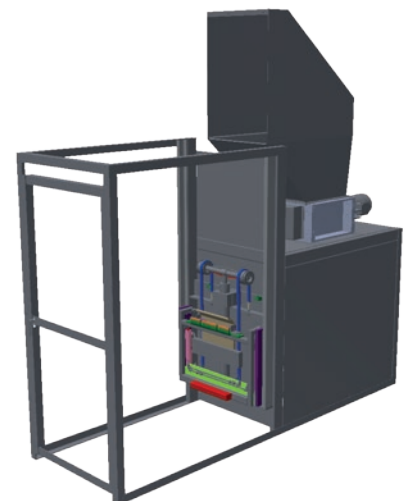

BOTTLE CRUSHER

Capacity for both types is approximately 3 tonnes/hour

Both types of the ReTec Bottle Crusher can be customized to deliver the size of glass fraction the customer's wishes.

Capacity for both types is approximately 3 tonnes/hour, although this to some extent depends on the desired size of the output.

Both types of the ReTec Bottle Crusher can be either implemented in an existing installation or used as stand alone machinery.
