

- a strong solution for the environment

MATERIAL DOSER SYSTEM

With conveyor belt for loading on trailer

The material doser system is easy to operate for the customer. By a push on a button a certain amount of compost/wood chips etc. are unloaded via the unloading belt onto trailer or truck. If a smaller amount than pre-determined is required, it is possible to stop the unloading.

- 100 % customer operated.
- Content aprox. 10 tons.
- Options:
 - Coin insertion
 - Electro hydraulic top-door
 - Hydraulic door remote controlled
 - GSM module with SMS alarm at an empty container
 - Weighing system
 - PLC control of various functions
